JAYA HIND
Casting End-to-End Solutions

CASTING

End to End Solutions

- High Pressure Die Casting • Gravity Die Casting • Tool Design and Manufacturing
- Machining and Sub-assembly • Auto Components

JAYA HIND INDUSTRIES LTD.

A Dr . Abhay Firodia Group Company

Our Founder

NAVALMAL FIRODIA

(1910 - 1997)

One Luminous Life, Three Lifetimes of Achievement

Young Freedom Fighter

Imprisoned at the age of 21 for active participation in Mahatma Gandhi's **non co-operation movement** in 1932, he endured brutal hardship with courage and dignity. Yet again, he suffered incarceration for a leading role in the **'Quit India' movement** of 1942.

Pioneering Industrialist

Navalmal Firodia gave us two of India's most iconic vehicle concepts – for passenger and goods transportation.

The **'Auto-rickshaw'** – a name he coined himself – has endured for half a century. Followed

by the **'Tempo'**, a term now generic to any kind of small goods vehicle in every town in India.

Passionate Philanthropist

Contributing generously of his time and wealth, he helped establish and strengthen several institutions working for the poor and destitute, for leprosy patients, for the sick and elderly, for rural education, for encouraging women's empowerment and the spiritual upliftment of society.

- Our grateful tribute

SHRI FIRODIA TRUST

About Us

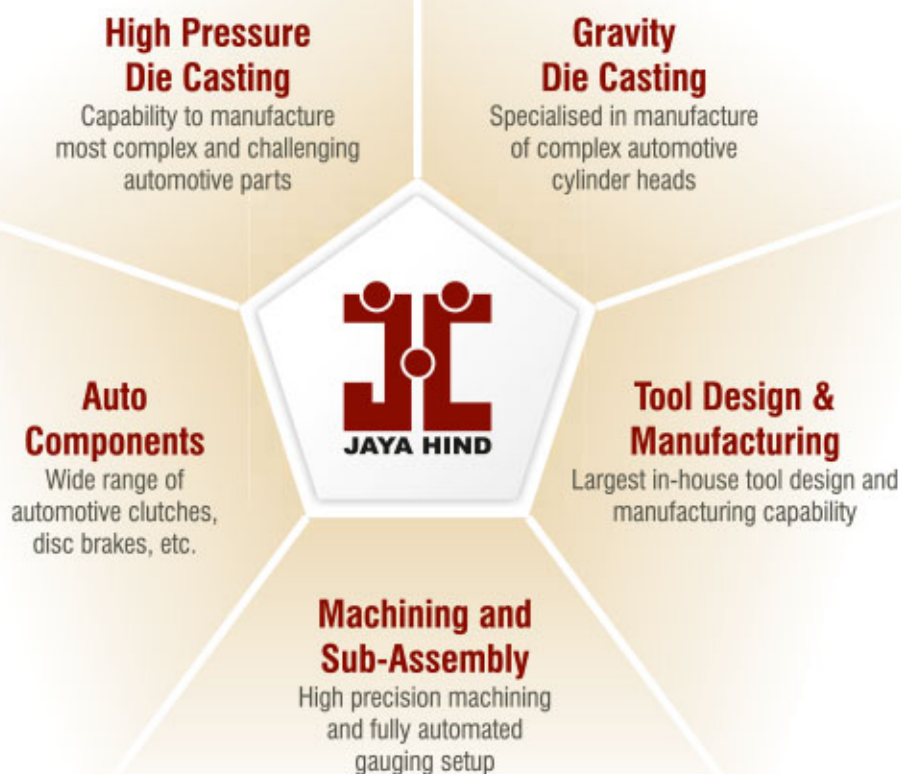

Jaya Hind Industries is part of Dr. Abhay Firodia Group. Established in 1947 by Late Shri. N.K. Firodia, a freedom fighter and pioneering industrialist, the company started manufacturing auto components primarily to support its vehicle manufacturing venture. Today, Jaya Hind is among India's largest and most trusted, end-to-end solutions provider for aluminum castings for global original equipment manufacturers.

Jaya Hind Industries has developed a wide portfolio of critical parts ranging from 5gm to 30kg, serving variety of industries in automotive as well as non-automotive fields. With intelligent investments in tool design, tool manufacturing on the upstream side, and in machining and assembly on the downstream side, Jaya Hind offers the complete range of solutions to auto manufacturers for weight reduction and localisation.

With manufacturing facilities at Akurdi and Urse (Maharashtra), Dewas (Madhya Pradesh) and Chennai (Tamil Nadu), Jaya Hind Industries has the largest in-house tool design and manufacturing capacity and one of the largest die-casting capacities in India.

Core Competencies

High Pressure Die Casting

The company has a comprehensive range of High Pressure Die Casting machines from 160T to 3200T, with the ability to manufacture parts weighing from 20 gm to 40 kg.

- Over 30 die casting machines deployed and still counting.
- Fully automatic die casting cells with robotic extraction, dosing furnace, auto-sprayers, real time controls, in-line trimming presses with state-of-the art technologies such as heating cooling units for dies, vacuum equipment, jet cooling, etc.
- Globally best technology deployed through world-class suppliers like Bühler (Switzerland), Frech (Germany), etc.
- Highly skilled manpower trained in Switzerland and Germany.

Real time process controls on HPDC machines

Completely integrated cells with robotic extraction, auto-sprayers, dosing furnaces, and integrated trimming presses.

Comprehensive range of HPDC equipment ranging from 160T to 3200T locking force

Tool Design and Manufacturing

Jaya Hind Industries has one of the largest tool design and manufacturing set ups in the Indian die casting industry, with the ability to manufacture critical High pressure die casting (HPDC) dies and critical gravity die casting tools.

- HPDC dies suitable for 160T to 3200T machines.
- Cylinder head tools and core boxes through gravity die cast process.
- Extremely critical dies for cylinder blocks and heads.
- Over 200 personnel engaged in design and manufacturing .
- 40 engineers working on cutting edge design and simulation software like IDEAS, TEBIS, Unigraphics, CATIA and Pro-CAST .
- World's best manufacturing equipment sourced from Charmilles (Switzerland), Bridgeport (UK), HAAS (USA), Mazak & Makino (Japan) and deployed for high productivity processes like CNC EDM, CNC Wire-Cut, 5-axis high speed milling (Ixon - Gun drilling machine, die spotting and matching, graphite electrode machining, etc.)
- Coordinate measuring machine with software to compare actual tool with 3D model.

Hi tech design / engineering center

Die manufacturing and assembly

5-axis High speed CNC milling machines

Machining and Sub-Assembly

The company has a dedicated process engineering set up for planning optimum machining and sub assembly of fixtures, tools and gauges that are designed in-house.

- Best-in-class machining centers like Mazak and Makino (Japan), BFW (India), etc.
- High productivity dedicated cellular lines for high volume parts.
- Temperature controlled environment for sensitive parts.
- Over 100 horizontal and vertical CNC machining centers deployed.
- World-class quality of parts capable of direct-online deployment at customer assembly line.

State-of-the-art machining centers

Flexible machining lines

Dedicated machining cells for high volume parts

Auto Components

Jaya Hind Industries manufactures wide range of automotive clutches ranging from 160mm dia to 430mm dia, covering vehicle platforms from small commercial vehicles, passenger cars to heavy commercial vehicles.

- All India network of dealers for efficient distribution of clutches in every corner of the country.
- Rigorous in-house development and testing of clutches before introduction to the market.
- Other products like caliper brakes, water pump assembly, thermostat assembly, oil pump assembly for aftermarket application.

Full range of clutches from 160mm dia to 430mm dia

Water pumps

Oil pumps

Disc Brakes

Quality

The focus on Quality is integral to Jaya Hind Industries' overall business strategy and in all manufacturing activities. It is aptly reflected in the company's choice of manufacturing and quality control equipment. The quality philosophy is derived and uncompromisingly deployed as per TS / IATF standards.

CMM

Co-ordinate measuring machines from world's best Carl Zeiss and Accurate.

GOM measuring and scanning machine

Metallurgy Lab

Advanced Metallurgy laboratory to validate metal composition and mechanical properties of the raw materials and castings.

NABL certified

X-ray Machines

Digital X-ray imaging to identify casting defects like blow holes, porosities and shrinkages during manufacturing.

Five X-ray machines

Standards Room

Modern standard room with state-of-the-art measurement and calibration equipment.

NABL certified

Auto-gauging

Component specific measurement equipment from Marposs (Italy) and Accurate (India) for 100% checking of special characteristics.

Partnerships and Recognition

Certifications

All our plants are certified for IATF standards, ISO 14001 (Environmental Management System) and the OHSAS 18001 (Occupational Health and Safety Assessment Standards).

The Calibration and Testing laboratories at Akurdi and Urse plants are accredited by National Accreditation Board for Testing and Calibration of Laboratories (NABL).

Awards and Recognition

Jaya Hind Industries has been recognised consistently for its manufacturing capability and performance.

The company was awarded the Best Foundry in the Large Scale Sector in 2016, 2014, 2010, and 2008 by ALUCAST, the association of aluminium die casters and equipment manufacturers.

Jaya Hind Industries has also been awarded for its performance from leading OEMs such as Renault Nissan, Volvo Eicher, Maruti Suzuki, Bosch, Mahindra, etc.

Technology Partners

Technical collaboration to manufacture aluminium cylinder blocks and structural parts

Joint Venture for development and manufacture of automotive cylinder heads

Partnership for finish machining of critical parts like cylinder blocks and cylinder heads

Range of Products

Cylinder Block  20.00 kg	Flywheel Housing  17. 00 kg	Clutch Housing  6.00 kg	Gear Box Housing  22.00 kg
Bed Plate  10.50 kg	Crankcase  6.90 kg	Timing Case  4.32 kg	Rocker Lever Housing  6.00 kg
Cam Carrier  1.15 kg	Compressor Housing  2.40 kg	Transmission Case  3.69 kg	Gear Shift housing  4.00 Kg
Intake Manifold  4.50 kg	Gear Housing  6.00 kg	Drip Pan  14.00 kg	Ladder Frame Assembly  5.00 kg
Cylinder Head  	Cylinder Head  	Cylinder Head  	
Oil Sump  5.70 kg	Ladder Frame  9.85 kg
